Neighbourhood	No
Socioeconomic Differences	No
Targets, Trends & Projections	Yes

KEY POINTS

+ve	North East Lincolnshire compared to the England average, has consistently had a significantly lower (better) percentage of emergency readmissions within 30 days of discharge.
------------	--

DESCRIPTION

This indicator examines the outcome for individuals discharged from hospital to monitor success in avoiding emergency admissions. Health interventions and social care will play significant roles in putting in place the right re-enablement, rehabilitation and intermediate care services to support individuals to return home or regain their independence, so avoiding crisis in the short term.

The indicator is defined as the percentage of emergency admissions to any hospital in England occurring within 30 days of the last, previous discharge from hospital after admission. Proportions are indirectly standardised.

(Improving outcomes and supporting transparency - Part 2, Department of Health, 2012).

NE LINCOLNSHIRE JSNA INDICATOR SUMMARY

NATIONAL, REGIONAL OR PEER GROUP
